

P1 Alert - Frontend Team

Generated: 2026-02-08 00:13:03

■ Alert Overview

Persona:	Power User
Action Taken:	Clicked country dropdown
Expectation:	Dropdown opens with country list
Confusion Score:	7/10
Status:	FAILED
Severity:	P1
F-Score:	78%
Responsible Team:	Frontend

■ Diagnosis

Country selector API endpoint returns 404 - missing v2 endpoint

■ Recommendations

1. Update API endpoint path from /v2/countries to /v1/countries
2. Add fallback mechanism for missing country data
3. Display user-friendly error message instead of blank dropdown
4. Implement client-side country list caching
5. Add error boundary for dropdown component

■ Network Logs

- GET https://api.deriv.com/v2/countries → 404
- GET https://api.deriv.com/v1/countries → 200

■ Console Logs

- [error] Failed to fetch: 404 Not Found

- [warning] Endpoint /v2/countries does not exist
- [error] Dropdown component failed to render list
